

project name	Nordal Natural Gas Pipeline	
owner	Concord Power Gas GmbH, Hamburg	
prime consultant	Dorsch Consult, Munich (Germany)	
location	Börnike (Berlin) to Lubmin (Baltic Sea) (Germany)	
project duration	begin	december 2002
	end	may 2005

The owner builds a new combined cycle power station in Lubmin on Baltic Sea shore. The new bidirectional natural gas pipeline once supplies the power station with natural gas from the Central European gas grid and twice links the planned Baltic Sea Pipeline with the Central European gas grid. The project includes compressing stations in Börnike, isolation and pipe scraper launching and receiving stations.

- length 200 km (124 miles)
- DN800 (32"), later expanded to DN1200 (48")

planned pipe scraper launching and receiving station

responsibilities

Turn key tender design, specification writing for mechanical works, rotating equipment (gas turbines, gas compressors), isolation valve stations, pipe scraper launching and receiving stations

procurement of line pipes, valve, bends: specification writing, vendor evaluation
